

Enterprise and Facility Operations

55GEEKS installs, integrates, maintains and restores the security, network and workplace technology that keeps facilities operating. Our leadership combines decades of technical experience with procurement, financial and operational oversight, supporting commercial organizations, service partners and public-sector clients.

MULTIMILLION

Government agreement portfolio*

Certified business qualifications

CORE CAPABILITIES

Security and video. CCTV, IP cameras, recording, video-management systems, access-system support, repairs and upgrades.

Cabling and networks. Voice/data, Cat6/Cat6A, pathways, racks, terminations, labeling, testing and connectivity restoration.

AV and workplace systems. Room controls, scheduling integration, configuration, commissioning and user guidance.

Maintenance and field support. Preventive and corrective service, troubleshooting, manufacturer coordination and closeout documentation.

Equipment procurement. Security, networking, computing, cabling, storage, UPS and infrastructure products; sourcing through delivery coordination.

EV charging support. Commissioning, communications troubleshooting and authorized field service within a defined scope.

EXPERIENCE AND DELIVERY

Our experience spans commercial security, workplace technology, network infrastructure and recurring field support, alongside a multimillion-dollar government agreement portfolio. Clients have direct access to leadership for technical escalation, equipment coordination and ongoing service planning.

COMMUNITY CONTRIBUTION

Our volunteer work includes a village computer lab in Guatemala in cooperation with Rotary, and structured cabling at Poverello House in Fresno.
